2. If we are unable to retain the services of our Key Managerial Personnel, our business and our operating results could be adversely impacted.

Our business operations and development largely depends on the continued performance of our managing directors, whole time directors and other key personnel. The loss of service of any of them could seriously affect our ability to manage and expand our business operations efficiently. Further, the loss of any of the senior management or other key personnel may adversely affect our operations, finances, development and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources may have adverse effect on our ability in business development, new projects execution and expansion of our business. We are dependent on our Key Managerial Personnel for setting our strategic direction and managing our businesses. The loss of our key managerial personnel may materially and adversely impact our results of operations and financial condition.

3. The sectors in which we operate are capital intensive in nature, and involve relatively long gestation periods, and we may not be able to raise the required capital for these projects or the capital to sustain these projects through their full development cycles, which could have a material adverse effect on our ability to complete our projects.

Projects in the sectors in which we operate typically are capital intensive, involve relatively long gestation periods, and require us to obtain financing through various means. Whether we can obtain such financing on acceptable terms which is dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investors' confidence, our levels of existing indebtedness and other factors beyond our control as well as on the timely completion of our projects. Therefore, our future financing attempts may not be successful or be on favorable terms. Any inability to arrange for financing on commercially acceptable terms could result adversely on our ability to complete our projects within stipulated time limit and may have an adverse effect on our business, results of operations and profitability.

4. We do not own our Registered Office premises, some of the Plants, and few of the premises from where we are currently operating and the same have been taken on lease. Any failure on our part to meet the terms of those lease agreements could jeopardize our interest severely.

We do not own our registered office (situated at 2 Ground Floor, Abhishek Complex, Opp. Hotel Haveli, Sector 11, Gandhinagar) and the same is taken on lease from Mr. Yoginkumar H Patel, (Our Managing Director and one of the Promoters of our Company) for a period of 5 years, starting from August 1, 2014. We have one unit named Pathikashram Hotel situated at Nr. S.T. Depo., GH-3 Circle, GH Road, Sector 11, Gandhinagar 382011 Gujarat which was taken as lease from Dy. Executive Engineer, Capital Project Div-3, Gujarat State Division, Gandhinagar w.e.f. December 31, 2012 for 5 years. Further, we have a manufacturing unit at Survey No. 78/1, Mouje Khartej Taluka and District, Gandhinagar which was taken as lease from Mr. Yoginkumar Patel & Ambusinh Gol (Managing Directors and Promoters of our Company) w.e.f. Further we have a plant at Survey No. 567, Village Derol, Himmatnagar, Sabarkantha which was taken as lease from Mr. Yoginkumar Patel & Ambusinh Gol (Managing Directors and Promoters of our Company) w.e.f. January 15, 2009 for 10 years. We also have one manufacturing unit at Block No. 1568/A, (Old Survey No. 1339), Khavad, Kadi which was taken as lease from Mr. Amratbhai Patel, Mr. Arvindbhai Patel, Mr. Ishwarbhai Patel and Mr. Ramanbhai Patel w.e.f. We also have one plant at Block No. 241 Mouje Kalri Bechraji, Mehsana which was taken as lease from Mr. Manish Thakkar, Mr. Naresh Thakkar, Mr. Mahavir Patel and Ms. Bhavna Prajapati w.e.f. September 1, 2016 for 2 years. Further, we also have plant at Survey No. 337/512 and 338, Piplaj Road, Gyaspur which was taken as lease from Ahmedabad Municipal Corporation w.e.f. June 11, 2013 for 5 years. If any of the owners of these leased/license/ arranged premises do not renew the agreements/ arrangements under which we occupy the premises or the pending litigation in this regard is decided adversely, we may suffer a disruption in our operations and might have to relocate. Further, the lands of some of the owned as well as the plants operating on lease basis, are yet to be converted into Non-Agricultural Land. For further details, please see the section "Litigation" beginning on page 225 of this Draft Prospectus and "Business Overview" beginning on page no 75 of this Draft Prospectus.

5. The proposed objects of the issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

The objects of the issue for which part of the fund are being raised to meet with working capital requirements have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this issue, as specified in the section titled "objects of the issue" are based on the company's estimates and deployment of these funds is at the discretion of the management and the Board of Directors of the company and the same will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. Further, the schedule of deployment of funds may change depending on the circumstances and management decision considering various factors including changes in laws and regulations, competition, irregularities or claims with respect to title of land, the ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

6. Our Order Book does not represent our future revenues and our actual income may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.

The Company has Orders from which it expects future revenue and profit. Order Book refers to a compilation of our expected revenues from uncompleted projects received. Projects in the order book represent business that is considered firm. Our Order Book does not necessarily indicate future earnings related to the performance of that work, as cancellations or unanticipated variations or scope or schedule adjustments may occur. Due to changes in project scope and schedule, we cannot predict with certainty when or if contracts in our Order Book will be performed. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to make the payments due. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business. For some of the contracts in our Order Book, our clients are obliged to perform or take certain actions, such as acquiring land, securing the right of way, securing required licenses, authorizations or permits, making advance payments or, approving supply chain vendors and shifting existing utilities. If a client does not perform such actions in a timely manner, and the possibility of such failure is not provided for in the contract, our projects could be delayed, modified or cancelled. Accordingly, the realization of our Order Book and the effect on our results of operations may vary significantly from reporting period to reporting period depending on the nature of such contracts, actual performance of such contracts, as well as the stage of completion of such contracts as of the relevant reporting date as it is also impacted by applicable accounting principles affecting revenue and cost recognition.

7. We procure Projects / Contracts on the basis of pre-qualification criteria and competitive bidding processes. We face intense competition from our Competitors including on account of competitive bids quoted by them.

In selecting contractors for the project, clients generally limit the tender to contractors that prequalifies based on several criterion including project execution experience, technical strength, performance capabilities, quality standards, ability to execute the project within the prescribed timeframe, etc. Disqualification on any of these grounds will make us ineligible for bidding. These pre-qualification criteria are at the discretion of the clients and we cannot assure that we would continue to meet the pre-qualification criterion of our existing or prospective clients. Further, even if we meet the pre-qualification criterias, there is no assurance that we will be able to quote most competitive / lowest bid amongst all bidders so that we get the contracts. These factors may limit us in getting contracts and resultantly our revenues and profitability may get declined.

8. We require certain registrations, licenses, approvals and permissions from government and regulatory authorities in the ordinary course of our business and any delay or failure to obtain them may adversely affect our operations.

We require certain registrations, licenses, permissions and approvals for operating our business. We may not have in place all the required registrations, licenses, permissions and approvals, which we need to obtain for our business under the applicable laws. If we fail to obtain any such registrations, licenses, permissions or approvals, whether applied for or otherwise, for our business, in a timely manner or at all, our overall business, financial condition and/or operating results may be adversely affected and our Company, Directors and/or Officers may be subjected to proceedings under the relevant statutes. Moreover, there can be no assurance that such approvals will be granted in timely manner or at all. Further, we were a private limited company in the name of "Akash Infra-Projects Private Limited and after complying with the relevant provisions under Companies Act, 2013, we had converted into public limited company with the name "Akash Infra-Projects Limited" in the Year 2016. In view of change of name of our Company, we are yet to obtain / change the necessary registrations, permissions and approvals etc. under our new name. In case we fail to transfer/obtain the same in name of the company same may adversely affect our business or we may not be able to carry our business

9. Majority of our Business operations are carried in Gujarat especially in Gandhinagar, Ahmedabad, Mehsana and Sabarkantha region and any adverse developments affecting our operations in Gujarat could have an adverse impact on our revenue and results of operations.

So far majority of our business operations have been into the territory of Gandhinagar, Ahmedabad, Mehsana, Sabarkantha districts in the State of Gujarat and Majority of our total sales are made in the state of Gujarat especially in Gandhinagar, Ahmedabad, Mehsana and Sabarkantha region. Such geographical concentration of our business in these region expose us to adverse developments related to competition, as well as economic and demographic changes in these region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India, if we decide to further expand our operations.

10. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

11. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

We operate in a working capital intense industry therefore our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

12. The breakdown or failure of our plant & machineries, equipments and/ or civil structure can disrupt our project schedules and may have a material adverse effect on our business, financial condition and operating results.

The breakdown or failure of our plant & machineries, equipments and/ or civil structure can disrupt our project schedules which may be within or beyond our control including accidents, fires, earthquakes, explosions, breakdown, failure or sub-standard performance of equipment, improper installation or operation of equipment, operational problems, transportation, interruptions, other environmental risks, and labour unrest and other natural disasters, resulting in our performance below targeted / expected levels and resultantly we may not fulfill the terms of completion of contracts / projects within a stipulated time period, whether under Contract Agreement or otherwise and it may give rise to any legal or penal action by our Clients against us for non-performance or delayed performance of the contacts and may adversely affect our business, financial condition and results of operations.

13. Our Company, Our business may suffer, if we fail to complete projects on time.

We derive a significant portion of our revenues from tenders based contracts awarded by local/ state/ central government bodies to be executed in time bound manner. If we fail to estimate accurately the resources and the time required for a fixed price project, future wage inflation rates or if we fail to complete our contractual obligations within the contracted time frame, our profitability may suffer. Our failure to complete fixed price projects within budget and on time will negatively affect our business, result of operations and profitability.

14. Our business strategies may not be successfully implemented.

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward. Changes in economic & industrial policies & applicable regulations may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

15. If we are unable to manage our growth, our business could decline.

The growth of our business depends on our project completion track record, our readiness for future project execution capabilities and our cost competitiveness in project execution. In order to achieve such future growth, we need to effectively manage our projects, assess new technologies, attract new clients, expand our reach to new geographies, obtain sufficient financing, maintain sufficient operational and financial controls and make additional capital investments to take advantage of anticipated market conditions. Our future growth depends mainly on our management and other

resources. Any inability to manage our growth could have an adverse effect on our business, financial condition and results of operations.

16. Any significant increases in the prices of crude oil & other raw materials and non-availability or timely unavailability of the same could adversely affect our business operations and the profitability of our Company.

India imports a significant majority of its requirements of crude oil. Crude oil prices are volatile and are subject to a number of factors, including the level of global production and political factors, such as war and other conflicts, particularly in the Middle East, where a substantial proportion of the world's oil reserves are located and currency fluctuations. While project execution, the plants, equipments, vehicles etc. consume sizable amount of fuel cost. Any significant increase in the price of crude oil could adversely affect our fuel & other operating costs, which will adversely impact the financial condition & profitability of the company.

Further, our main raw materials are bitumen, greet, kapchi, steel, cement etc., which are procured mainly from the local sources. As on date we have not entered into any long term tie-up/ contract or agreements for supply of these raw materials with any of our suppliers. Any decrease in the availability of these raw materials for whatever reason could adversely affect our ability to procure these materials. We may also be required to search for new source of raw materials which could consume both time and cost. Further, any price volatility of these raw materials and our inability to adjust to the same could affect our results of operations and profitability.

17. Our lenders have charge on our movable and immovable properties in respect of finance availed by us.

We have created charge over our certain properties to avail working capital & other credit facilities from our Banker(s). In the event, we default in repayment of these loans availed by us and any interest thereof, our properties may be forfeited by lenders and we may have to incur other financial losses in terms of penal interest and other penal actions. For further information on the financing and loan agreements along with the total amounts outstanding, please refer to Section Indebtedness under the Chapter "Business Overview" on page 79 of this Draft Prospectus.

18. The Insurance cover taken by our Company may not be adequate to protect against certain business risks. This may have adverse impact on our financial conditions and operating results.

Our Company has taken insurance cover for its various Assets and Liabilities to meet with any possible or unexpected occurrence of events resulting in loss or damage to it. However, such insurance may not be adequate to cover all our Assets, liabilities or losses that may arise from our operations. Our insurance policies contain exclusions and or all limitations on coverage, as a result of which, we may not be able to successfully assert our claims. Further, to the extent that any uninsured risks materialize or if it fails to effectively cover itself for any risks, we may be exposed to substantial damages, costs, liabilities, losses etc. that would adversely affect our business operations and financial condition. Any change in terms of insurance policies, successful assertion of one or more large claims against our Company which exceeds our available insurance coverage or the imposition of a large deductible or coinsurance requirement, if any, could adversely affect our financial condition and results of operations. Moreover, there can be no assurance that in the future we will be able maintain insurance of the types or at levels which we deem necessary or adequate or at premiums which we deem to be commercially acceptable.

This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company's best interest. In addition, for so long as our Promoter and the members of our Promoter Group continue to exercise significant control over the Company they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or other convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

47. Terrorist attacks, civil unrest, hostilities and other acts of violence could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may adversely affect the Indian markets on which our Equity Shares will trade. These acts may result in a loss of business confidence and have other consequences that could have an adverse effect on our business. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of our Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse impact on business in general and also on business of our company. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the market price of our Equity Shares.

The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

52. Financial instability in Indian financial markets could adversely affect our company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

54. Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows and our capital & expenditure requirements.

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

55. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to the offer, there has been no public market for our Equity Shares and an active trading market on the SME Platform of NSE. 56. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of NSE in a timely manner, or at all.

In terms of Chapter XB of the SEBI (ICDR) Regulations, 2009, as amended from time to time, we are not required to obtain any in-principle approval for listing of shares issued. We have only applied to NSE to use its name as the Stock Exchange in this Draft Offer Document for listing our shares on the SME Platform of NSE. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of NSE. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page 44 of this Draft Prospectus.

58. There are restrictions on daily / weekly / monthly / annual movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time

Once listed, we would be subject to circuit breakers imposed by stock exchange in India i.e. SME Platform of NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the trading volumes and historical volatility in the price of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

59. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. GLOBAL ECONOMIC OVERVIEW

The global macro economic landscape is currently charting a rough and uncertain terrain characterized by weak growth of world output. The situation has been exacerbated by; (i) declining prices of a number of commodities, with reduction in crude oil prices being the most visible of them, (ii) turbulent financial markets (more so equity markets), and (iii) volatile exchange rates. These conditions reflect extreme risk-aversion behavior of global investors, thus putting many, and in particular, commodities exporting economies under considerable stress.

One important positive outcome in 2015 is the modest pickup in the growth of some of the advanced economies. However, growth in emerging market and developing economies declined for the fifth consecutive year. As a result, overall global economic activity remained subdued in 2015. In its latest Update of the World Economic Outlook (WEO), published on 19 January 2016, the IMF projected growth in the global economy to improve from 3.1 per cent in 2015, to 3.4 per cent in 2016 and further to 3.6 per cent in 2017. Growth in advanced economies is projected at 2.1 per cent in 2016 and to continue through 2017 at the same rate.

The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large Emerging Market and Developing economies (EMDE) are likely to continue to weigh on their growth prospects in 2016–17. Assessments indicate that mixed inflation developments in the EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past year. The WEO update also indicated that India and the rest of emerging Asia are bright spots, with some other countries facing strong headwinds from China's economic rebalancing and global manufacturing weakness. World trade volume growth projections have been placed at 2.6 per cent and 3.4 per cent respectively for 2015 and 2016, which is much lower than what was estimated earlier in WEO in October 2015.

GLOBAL OUTLOOK FOR GROWTH

One important positive outcome in 2015 was the modest pick-up in growth in some of the advanced economies. It might be recalled that after falling in 2009 due to the 2008 global financial crisis, growth in emerging and developing economies rebounded in 2010 and 2011. While advanced economies also exhibited a recovery in 2010 thanks to the large stimuli, global growth continued to be tepid relative to the average of the decade ending 2006, largely on account of the slowdown in advanced economies. Spillover effects of the crisis may have been large, prolonged and bi-directional, given that the global integration is far greater than in the prior decade. This has made the task of projecting global economic outlook arduous. This uncertainty has led to the International Monetary Fund (IMF) revising the global growth outlook in its World Economic Outlook (WEO) four times a year since 2009.

In its latest WEO Update, published on 19 January 2016, the IMF has projected growth in the global economy to go up from 3.1 per cent in 2015 to 3.4 per cent in 2016 and further to 3.6 per cent in 2017, slightly lower than the projection published in October 2015. Growth in advanced economies is revised by 0.2 percentage points in 2016 to 2.1 per cent, to continue through 2017. Growth in the US is expected to remain resilient owing to strengthening of the housing and labour markets. Growth in the euro area is expected to increase due to stronger private consumption supported by lower oil prices and easy financial conditions is expected to outweigh the weakening in net exports. Growth in Japan is also expected to consolidate in 2016, on the back of fiscal support, lower oil prices, accommodative financial conditions, and rising incomes.

Overall global economic activity remained subdued in 2015, as growth in emerging market and developing economies (EMDE) declined for the fifth consecutive year and recovery in advanced economies was modest. This is also attributable to the changing composition of the global economy and relative point contributions to global growth. The fall in the contribution of the EMDEs is not being made good by the advanced economies. A recent feature is that the Chinese economy is gradually slowing down and is transitioning from investment demand to consumption demand and from manufacturing to services. The concern over the spill over's of subdued global growth to other economies through trade channels and weaker commodity prices is manifest in diminishing confidence and increasing volatility in financial markets. In addition, a dual monetary policy—a gradual tightening in monetary policy in the US in the backdrop of its resilient

recovery and easy monetary policy in several other major advanced economies has led to continued uncertainties and poses challenges for the year ahead. In the case of EMDEs, growth remained subdued at 4 per cent in 2015, but is projected to increase to 4.3 per cent in 2016 and 4.7 per cent in 2017. The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large emerging market economies will continue to weigh on growth prospects in 2016–17. Assessments indicate that mixed inflation developments in EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past year.

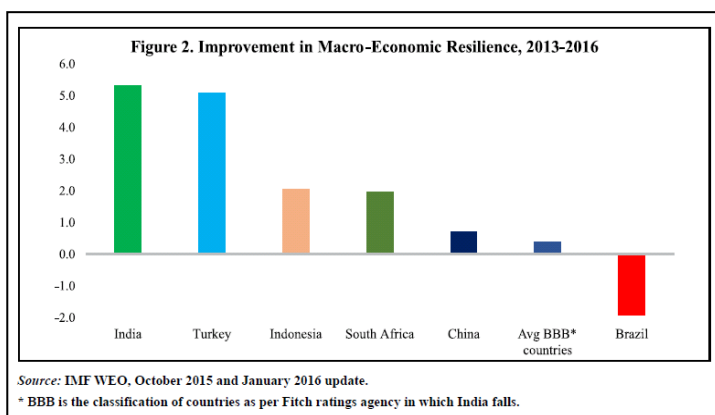

The 19 January WEO Update also indicated that India and the rest of emerging Asia are bright spots, albeit with some countries facing strong headwinds from China’s economic rebalancing and global manufacturing weakness. The IMF’s growth forecast for India is 7.5 per cent in 2016 and 2017 and this surpasses the projection of 6.3 per cent and 6.0 per cent respectively for China. The level of global economic activity has a significant and direct bearing on the growth prospects of the emerging economies through trade channels. As per the Update, world trade volume growth projections have been placed at 3.4 per cent and 4.1 per cent respectively for 2016 and 2017 lower by 0.7 percentage points to 0.5 percentage point respectively from WEO, October 2015. The World Bank’s Report on Global Economic Prospects (January 2016) also estimated that India will grow by a robust 7.8 per cent in 2016 and 7.9 per cent in the following two years. Compared to other major developing countries, the report maintained that India is well positioned to withstand near-term headwinds and volatility in global financial markets due to reduced external vulnerabilities, a strengthening domestic business cycle, and a supportive policy environment.

THE INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring macroeconomic stability. A sense of this turnaround is illustrated by a cross-country comparison. In last year’s Survey, we had constructed an overall index of macroeconomic vulnerability, which adds a country’s fiscal deficit, current account deficit, and inflation. This index showed that in 2012 India was the most vulnerable of the major emerging market countries. Subsequently, India has made the most dramatic strides in reducing its macro-vulnerability. Since 2013, its index has improved by 5.3 percentage points compared with 0.7 percentage points for China, 0.4 percentage points for all countries in India’s investment grade (BBB), and a deterioration of 1.9 percentage points in the case of Brazil (Figure 2).

If macro-economic stability is one key element of assessing a country’s attractiveness to investors, its growth rate is another. In last year’s Survey we had constructed a simple Rational Investor Ratings Index (RIRI) which combined two elements, growth serving as a gauge for rewards and the macro-economic vulnerability index proxying for risks. The RIRI is depicted in Figure 3; higher levels indicate better performance. As can be seen, India performs well not only in terms of the change of the index but also in terms of the level, which compares favorably to its peers in the BBB investment grade and even its —betters in the A grade¹. As an investment proposition, India stands out internationally.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

In the Advance Estimates of GDP that the Central Statistics Office (CSO) released recently, the growth rate of GDP at constant market prices is projected to increase to 7.6 per cent in 2015-16 from 7.1 per cent in 2014-15, mainly because private final consumption expenditure has accelerated. Similarly, the growth rate of GVA for 2015-16 is estimated at 7.3 per cent vis-à-vis 7.1 per cent in 2014-15. Although agriculture is likely to register low growth for the second year in a row on account of weak monsoons, it has performed better than last year. Industry has shown significant improvement

primarily on account of the surprising acceleration in manufacturing (9.5 per cent vis-à-vis 5.5 per cent in 2014-15). Meanwhile, services continue to expand rapidly.

- Even as real growth has been accelerating, nominal growth has been falling, to historically low levels, an unusual trend highlighted in the Mid-Year Economic Analysis (MYEA), 2015- 16.
- According to the Advance Estimates, nominal GDP (GVA) is likely to increase by just 8.6 (6.8) percent in 2015-16.
- In nominal terms, construction is expected to stagnate, while even the dynamic sectors of trade and finance are projected to grow by only 7 to 73/4 percent.
- Inflation remains under control The CPI-New Series inflation has fluctuated around 51/2 percent, while measures of underlying trends—core inflation, rural wage growth and minimum support price increases—have similarly remained muted. Meanwhile, the WPI has been in negative territory since November 2014, the result of the large falls in international commodity prices, especially oil. As low inflation has taken hold and confidence in price stability has improved, gold imports have largely stabilized, notwithstanding the end of a period of import controls
- Similarly, the external position appears robust. The current account deficit has declined and is at comfortable levels; foreign exchange reserves have risen to US\$351.5 billion in early February 2016, and are well above standard norms for reserve adequacy; net FDI inflows have grown from US\$21.9 billion in April-December 2014-15 to US\$27.7 billion in the same period of 2015-16; and the nominal value of the rupee, measured against a basket of currencies, has been steady. India was consequently well-positioned to absorb the volatility from the U.S. Federal Reserve actions to normalize monetary policy that occurred in December 2015. Although the rupee has declined against the dollar, it has strengthened against the currencies of its other trading partners.
- The fiscal sector registered three striking successes: on-going fiscal consolidation, improved indirect tax collection efficiency; and an improvement in the quality of spending at all levels of government.
- Government tax revenues are expected to be higher than budgeted levels. Direct taxes grew by 10.7 per cent in the first 9 months (9M) of 2015-16. Indirect taxes were also buoyant. In part, this reflected excise taxes on diesel and petrol and an increase in the Swachh Bharat cess. The central excise duty collection from petroleum products during April to December 2015-16 recorded a growth of 90.5 per cent and stood at ₹ 1.3 lakh crore as against ₹ 0.7 lakh crore in the same period last year. Tax performance also reflected an improvement in tax administration because revenues increased even after stripping out the additional revenue measures (ARMs). Indirect tax revenues grew by 10.7 per cent (without ARMs) and 34.2 per cent (with ARMs).
- The main findings are that a welcome shift in the quality of spending has occurred from revenue to investment, and towards social sectors. Aggregate public investment has increased by about 0.6 per cent of GDP in the first 8 months of this fiscal year, with contributions from both the Centre (54 per cent) and states (46 per cent).

OVERVIEW OF THE CONSTRUCTION INDUSTRY

Construction activity creates physical assets in a number of sectors of the economy. Construction sector has two key segments: (i) Buildings, falling into one of the following categories: residential, commercial, institutional and industrial; and (ii) Infrastructure such as road, rail, dams, canals, airports, power systems, telecommunication systems, urban infrastructure including water supply, sewerage, and drainage and rural infrastructure. Assets once created also need to be maintained. Many upstream economic activities depend upon the construction sector. It is roughly estimated that 40–45 per cent of steel; 85 per cent of paint; 65–70 per cent of glass and significant portions of the output from automotive, mining and excavation equipment industries are used in the construction industry.

Construction accounts for nearly 60–80 per cent of the of project cost of roads and housing and a significant portion in case of other infrastructure sectors. Construction materials such as cement and steel, bricks and tiles, sands and aggregates, fixtures and fittings, paints and chemicals, petrol and other petro-products, timber, minerals, aluminium, glass and plastics account for nearly two-third of the construction costs. The forward and backward multiplier impact of the construction industry is significant.

The Construction sector has been contributing around 8 per cent to the nation's GDP (at constant prices) in the last five years (2006–07 to 2010–11). GDP from Construction at factor cost (at constant prices) increased to ₹ 3.85 Lakh crore (7.9 per cent of the total GDP) in 2010–11 from ₹ 2.85 Lakh crore (8 per cent of the total GDP) in 2006–07. The growth in construction sector in GDP has primarily been on account of increased spending on physical infrastructure in the last few years through programmes such as National Highway Development (NHDP) and PMGSY/Bharat Nirman.

Major developments in the construction sector

Some notable achievements during the previous plan periods have been:

- Construction Sector was declared as an industrial concern under the IDBI Act in March 2000 in order to increase the flow of institutional credit to the sector.
- Implementation of national Human Resource Development (HRD) initiatives in the non-formal sector, including the workers' level to the upper levels of engineering and managerial categories.
- Setting up of the Arbitral Institutions for resolution of business disputes in construction industry.
- Obtaining state-of-the-art global technology through strategic association between industry, government and international bodies
- Effective dissemination of information, regarding good work practices, and development of an action frame work for quality and safety audits, assessment and certification as well as training of man-power both for practice and research.
- Electronic tendering process, online publishing of tender notices and related procedures are becoming more and more common.
- Setting up of models of public-private partnership in construction activity.
- Development of consultancy and advisory services in the areas of project and construction management, procurement services, regulatory issues, and technology. Institutional Arbitration has taken firm root with the operationalisation of Construction Industry Arbitration Council. Nineteen cases have been undertaken so far.
- Specialized institution (Construction Industry Vocational Training Council) was set up at the national level to provide training to vocational and supervisory trades of the construction industry.
- Safety record of the industry has shown improvement. The accident frequency rate in 2011 declined to 0.006 accidents per million man-hours worked from 0.009 in 2007. This is due to professionalization of big contractors.

KEY DRIVERS OF GROWTH OF CONSTRUCTION INDUSTRY

Forecasts for the market size of construction industry for the Twelfth Plan period indicate that the aggregate output of the industry during the period 2012–13 to 2016–2017 is likely to be ₹ 52.31 Lakh Crores increasing from ₹ 7.67 Lakh Crores in 2012–13 to ₹ 13.59 Lakh Crores in 2016–17. As noted earlier, growth in construction industry is linked to the growth in the infrastructure sector and the building industry. The output of the industry is likely to be contributed almost equally by the buildings and infrastructure segments respectively. The thrust on capacity expansion in the infrastructure sector will continue in the Twelfth Plan.

Apart from steady growth in construction related to industrial buildings, the industry catering to commercial real estate in the non-residential sector is likely to grow at an accelerated pace due to a vibrant and growing service industry such as IT and related sectors, hospitality and tourism industry and logistics services. The real estate sector faces challenges despite strong growth in the past. The current trend in real estate market is that after making investments in land, the project construction is mainly retail financed, that is, through advances or milestone based payments from owners. In affordable housing projects retail financing would be a challenge as the ability of the retail investors would be very limited. This issue becomes more significant in the category of affordable housing for low income group and economically and weaker segments of the society.

Even though the construction sector is attracting both domestic (gross bank credit) as well as foreign direct investment, more resources are needed for the sector to fulfill the ever rising pressures of enhancing the housing and infrastructure sectors in the country. The cumulative FDI inflows from April 2000 to August 2011 into construction activities stood at around US\$ 9,417 million or ₹ 42,072 Crore, which is nearly 6 per cent of the total cumulative FDI inflow into the country during same period.

Provided that securities locked in as Promoters' Contribution for 3 (three) years under Regulation 36(a) of the SEBI ICDR Regulations may be pledged only if, in addition to fulfilling the above requirement, the loan has been granted by such scheduled commercial bank or public financial institution for the purpose of financing one or more of the objects of the Issue.

GLOBAL ECONOMIC ENVIRONMENT

INTRODUCTION

Since the Economic Survey and Budget were presented a year ago, the Indian economy has continued to consolidate the gains achieved in restoring macro-economic stability. Inflation, the fiscal deficit, and the current account deficit have all declined, rendering India a relative haven of macro stability in these turbulent times. Economic growth appears to be recovering, albeit at varying speeds across sectors.

At the same time, the upcoming Budget and 2016-17 (FY-2017) economic policy more broadly, will have to contend with an unusually challenging and weak external environment. Although the major international institutions are yet again predicting that global growth will increase from its current subdued level, they assess that risks remain tilted to the downside. This uncertain and fragile outlook will complicate the task of economic management for India.

The risks merit serious attention not least because major financial crises seem to be occurring more frequently. The Latin American debt crisis of 1982, the Asian Financial crisis of the late 1990s, and the Eastern European crisis of 2008 suggested that crises might be occurring once a decade. But then the rapid succession of crises, starting with Global Financial Crisis of 2008 and proceeding to the prolonged European crisis, the mini-crises of 2013, and the China provoked turbulence in 2015 all hinted that the intervals between events are becoming shorter.

This hypothesis could be validated in the immediate future, since identifiable vulnerabilities exist in at least three large emerging economies—China, Brazil, Saudi Arabia—at a time when underlying growth and productivity developments in the advanced economies are soft. More flexible exchange rates, however, could moderate full-blown eruptions into less disruptive but more prolonged volatility.

One tail risk scenario that India must plan for is a major currency re-adjustment in Asia in the wake of a similar adjustment in China; as such an event would spread deflation around the world. Another tail risk scenario could unfold as a consequence of policy actions—say, capital controls taken to respond to curb outflows from large emerging market countries, which would further moderate the growth impulses emanating from them.

In either case, foreign demand is likely to be weak, forcing India—in the short run—to find and activate domestic sources of demand to prevent the growth momentum from weakening. At the very least, a tail risk event would require Indian monetary and fiscal policy not to add to the deflationary impulses from abroad. The consolation would be that weaker oil and commodity prices would help keep inflation and the twin deficits in check.

GLOBAL ECONOMIC OVERVIEW

The global macro economic landscape is currently charting a rough and uncertain terrain characterized by weak growth of world output. The situation has been exacerbated by; (i) declining prices of a number of commodities, with reduction in crude oil prices being the most visible of them, (ii) turbulent financial markets (more so equity markets), and (iii) volatile exchange rates. These conditions reflect extreme risk-aversion behavior of global investors, thus putting many, and in particular, commodities exporting economies under considerable stress. One important positive outcome in 2015 is the modest pickup in the growth of some of the advanced economies. However, growth in emerging market and developing economies declined for the fifth consecutive year. As a result, overall global economic activity remained subdued in 2015. In its latest Update of the World Economic Outlook (WEO), published on 19 January 2016, the IMF projected growth in the global economy to improve from 3.1 per cent in 2015, to 3.4 per cent in 2016 and further to 3.6 per cent in 2017. Growth in advanced economies is projected at 2.1 per cent in 2016 and to continue through 2017 at the same rate.

The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large Emerging

Market and Developing economies (EMDE) are likely to continue to weigh on their growth prospects in 2016–17. Assessments indicate that mixed inflation developments in the EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past year. The WEO update also indicated that India and the rest of emerging Asia are bright spots, with some other countries facing strong headwinds from China's economic rebalancing and global manufacturing weakness. World trade volume growth projections have been placed at 2.6 per cent and 3.4 per cent respectively for 2015 and 2016, which is much lower than what was estimated earlier in WEO in October 2015.

GLOBAL OUTLOOK FOR GROWTH

One important positive outcome in 2015 was the modest pick-up in growth in some of the advanced economies. It might be recalled that after falling in 2009 due to the 2008 global financial crisis, growth in emerging and developing economies rebounded in 2010 and 2011. While advanced economies also exhibited a recovery in 2010 thanks to the large stimuli, global growth continued to be tepid relative to the average of the decade ending 2006, largely on account of the slowdown in advanced economies. Spillover effects of the crisis may have been large, prolonged and bi-directional, given that the global integration is far greater than in the prior decade. This has made the task of projecting global economic outlook arduous. This uncertainty has led to the International Monetary Fund (IMF) revising the global growth outlook in its World Economic Outlook (WEO) four times a year since 2009.

In its latest WEO Update, published on 19 January 2016, the IMF has projected growth in the global economy to go up from 3.1 per cent in 2015 to 3.4 per cent in 2016 and further to 3.6 per cent in 2017, slightly lower than the projection published in October 2015. Growth in advanced economies is revised by 0.2 percentage points in 2016 to 2.1 per cent, to continue through 2017. Growth in the US is expected to remain resilient owing to strengthening of the housing and labour markets. Growth in the euro area is expected to increase due to stronger private consumption supported by lower oil prices and easy financial conditions is expected to outweigh the weakening in net exports. Growth in Japan is also expected to consolidate in 2016, on the back of fiscal support, lower oil prices, accommodative financial conditions, and rising incomes.

Overall global economic activity remained subdued in 2015, as growth in emerging market and developing economies (EMDE) declined for the fifth consecutive year and recovery in advanced economies was modest. This is also attributable to the changing composition of the global economy and relative point contributions to global growth. The fall in the contribution of the EMDEs is not being made good by the advanced economies. A recent feature is that the Chinese economy is gradually slowing down and is transitioning from investment demand to consumption demand and from manufacturing to services. The concern over the spill over's of subdued global growth to other economies through trade channels and weaker commodity prices is manifest in diminishing confidence and increasing volatility in financial markets. In addition, a dual monetary policy—a gradual tightening in monetary policy in the US in the backdrop of its resilient recovery and easy monetary policy in several other major advanced economies has led to continued uncertainties and poses challenges for the year ahead. In the case of EMDEs, growth remained subdued at 4 per cent in 2015, but is projected to increase to 4.3 per cent in 2016 and 4.7 per cent in 2017. The slowdown and rebalancing of the Chinese economy, lower commodity prices, and strains in some large emerging market economies will continue to weigh on growth prospects in 2016–17. Assessments indicate that mixed inflation developments in EMDEs reflect the conflicting implications of weak domestic demand and lower commodity prices versus marked currency depreciations over the past year.

The 19 January WEO Update also indicated that India and the rest of emerging Asia are bright spots, albeit with some countries facing strong headwinds from China's economic rebalancing and global manufacturing weakness. The IMF's growth forecast for India is 7.5 per cent in 2016 and 2017 and this surpasses the projection of 6.3 per cent and 6.0 per cent respectively for China. The level of global economic activity has a significant and direct bearing on the growth prospects of the emerging economies through trade channels. As per the Update, world trade volume growth projections have been placed at 3.4 per cent and 4.1 per cent respectively for 2016 and 2017 lower by 0.7 percentage points to 0.5 percentage point respectively from WEO, October 2015. The World Bank's Report on Global Economic Prospects (January 2016) also estimated that India will grow by a robust 7.8 per cent in 2016 and 7.9 per cent in the following two years. Compared to other major developing countries, the report maintained that India is well positioned to withstand near-term headwinds and volatility in global financial markets due to reduced external vulnerabilities, a strengthening domestic business cycle, and a supportive policy environment.

THE INDIAN ECONOMY

The Indian economy has continued to consolidate the gains achieved in restoring Macroeconomic stability. A sense of this turnaround is illustrated by a cross-country comparison. In last year's Survey, we had constructed an overall index of macroeconomic vulnerability, which adds a country's fiscal deficit, current account deficit, and inflation. This index showed that in 2012 India was the most vulnerable of the major emerging market countries. Subsequently, India has made the most dramatic strides in reducing its macro-vulnerability. Since 2013, its index has improved by 5.3 percentage points

compared with 0.7 percentage points for China, 0.4

percentage points for all countries in India's investment grade (BBB), and a deterioration of 1.9 percentage points in the case of Brazil (Figure 2).

If macro-economic stability is one key element of assessing a country's attractiveness to investors, its growth rate is another. In last year's Survey we had constructed a simple Rational Investor Ratings Index (RIRI) which combined two elements, growth serving as a gauge for rewards and the macro-economic vulnerability index proxying for risks. The RIRI is depicted in Figure 3; higher levels indicate better performance. As can be seen, India performs well not only in terms of the change of the index but also in terms of the level, which compares favourably to its peers in the BBB investment grade and even its —betters in the A grade¹. As an investment proposition, India stands out internationally.

REVIEW OF MAJOR DEVELOPMENTS IN INDIAN ECONOMY

In the Advance Estimates of GDP that the Central Statistics Office (CSO) released recently, the growth rate of GDP at constant market prices is projected to increase to 7.6 per cent in 2015-16 from per cent in 2014-15, mainly because private final consumption expenditure has accelerated. Similarly, the growth rate of GVA for 2015-16 is estimated at 7.3 per cent vis-à-vis 7.1 per cent in 2014-15. Although agriculture is likely to register low growth for the second year in a row on account of weak monsoons, it has performed better than last year. Industry has shown significant improvement primarily on account of the surprising acceleration in manufacturing (9.5 per cent vis-à-vis 5.5 per cent in 2014-15). Meanwhile, services continue to expand rapidly.

- Even as real growth has been accelerating, nominal growth has been falling, to historically low levels, an unusual trend highlighted in the Mid-Year Economic Analysis (MYEA), 2015- 16.
- According to the Advance Estimates, nominal GDP (GVA) is likely to increase by just 8.6 (6.8) percent in 2015-16.
- In nominal terms, construction is expected to stagnate, while even the dynamic sectors of trade and finance are projected to grow by only 7 to 7¾ percent.
- Inflation remains under control The CPI-New Series inflation has fluctuated around 5½ percent, while measures of underlying trends—core inflation, rural wage growth and minimum support price increases—have similarly remained muted. Meanwhile, the WPI has been in negative territory since November 2014, the result of the large falls in international commodity prices, especially oil. As low inflation has taken hold and confidence in price stability has improved, gold imports have largely stabilized, notwithstanding the end of a period of import controls
- Similarly, the external position appears robust. The current account deficit has declined and is at comfortable levels; foreign exchange reserves have risen to US\$351.5 billion in early February 2016, and are well above standard norms for reserve adequacy; net FDI inflows have grown from US\$21.9 billion in April-December 2014-15 to US\$27.7 billion in the same period of 2015-16; and the nominal value of the rupee, measured against a basket of currencies, has been steady. India was consequently well-positioned to absorb the volatility from the U.S. Federal Reserve actions to normalize monetary policy that occurred in December 2015. Although the rupee has declined against the dollar, it has strengthened against the currencies of its other trading partners.
- The fiscal sector registered three striking successes: on-going fiscal consolidation, improved indirect tax collection efficiency; and an improvement in the quality of spending at all levels of government.
- Government tax revenues are expected to be higher than budgeted levels. Direct taxes grew by 10.7 per cent in the first 9 months (9M) of 2015-16. Indirect taxes were also buoyant. In part, this reflected excise taxes on diesel and petrol and an increase in the Swatch Bharat cess. The central excise duty collection from petroleum products during April to December 2015-16 recorded a growth of 90.5 per cent and stood at ₹ 1.3 lakh Crore as against ₹ 0.7 lakh Crore in the same period last year. Tax performance also reflected an improvement in tax administration because revenues

increased even after stripping out the additional revenue measures (ARMs). Indirect tax revenues grew by 10.7 per cent (without ARMs) and 34.2 per cent (with ARMs).

- The main findings are that a welcome shift in the quality of spending has occurred from revenue to investment, and towards social sectors. Aggregate public investment has increased by about 0.6 per cent of GDP in the first 8 months of this fiscal year, with contributions from both the Centre (54 per cent) and states (46 per cent).

OVERVIEW OF THE CONSTRUCTION INDUSTRY

Construction activity creates physical assets in a number of sectors of the economy. Construction sector has two key segments: (i) Buildings, falling into one of the following categories: residential, commercial, institutional and industrial; and (ii) Infrastructure such as road, rail, dams, canals, airports, power systems, telecommunication systems, urban infrastructure including water supply, sewerage, and drainage and rural infrastructure. Assets once created also need to be maintained. Many upstream economic activities depend upon the construction sector. It is roughly estimated that 40–45 per cent of steel; 85 per cent of paint; 65–70 per cent of glass and significant portions of the output from automotive, mining and excavation equipment industries are used in the construction industry.

Construction accounts for nearly 60–80 per cent of the of project cost of roads and housing and a significant portion in case of other infrastructure sectors. Construction materials such as cement and steel, bricks and tiles, sands and aggregates, fixtures and fittings, paints and chemicals, petrol and other petro-products, timber, minerals, aluminium, glass and plastics account for nearly two-third of the construction costs. The forward and backward multiplier impact of the construction industry is significant.

The Construction sector has been contributing around 8 per cent to the nation's GDP (at constant prices) in the last five years (2006–07 to 2010–11). GDP from Construction at factor cost (at constant prices) increased to ` 3.85 Lakh Crore (7.9 per cent of the total GDP) in 2010–11 from ` 2.85 Lakh Crore (8 per cent of the total GDP) in 2006–07. The growth in construction sector in GDP has primarily been on account of increased spending on physical infrastructure in the last few years through programmes such as National Highway Development (NHDP) and PMGSY/Bharat Nirman.

MAJOR DEVELOPMENTS IN THE CONSTRUCTION SECTOR

Some notable achievements during the previous plan periods have been:

- Construction Sector was declared as an industrial concern under the IDBI Act in March 2000 in order to increase the flow of institutional credit to the sector.
- Implementation of national Human Resource Development (HRD) initiatives in the non-formal sector, including the workers' level to the upper levels of engineering and managerial categories.
- Setting up of the Arbitral Institutions for resolution of business disputes in construction industry.
- Obtaining state-of-the-art global technology through strategic association between industry, government and international bodies
- Effective dissemination of information, regarding good work practices, and development of an action frame work for quality and safety audits, assessment and certification as well as training of man-power both for practice and research.
- Electronic tendering process, online publishing of tender notices and related procedures are becoming more and more common.
- Setting up of models of public-private partnership in construction activity.
- Development of consultancy and advisory services in the areas of project and construction management, procurement services, regulatory issues, and technology. Institutional Arbitration has taken firm root with the operationalisation of Construction Industry Arbitration Council. Nineteen cases have been undertaken so far.
- Specialized institution (Construction Industry Vocational Training Council) was set up at the national level to provide training to vocational and supervisory trades of the construction industry.
- Safety record of the industry has shown improvement. The accident frequency rate in 2011 declined to 0.006 accidents per million man-hours worked from 0.009 in 2007. This is due to professionalization of big contractors.

KEY DRIVERS OF GROWTH OF CONSTRUCTION INDUSTRY

Forecasts for the market size of construction industry for the Twelfth Plan period indicate that the aggregate output of the industry during the period 2012–13 to 2016–2017 is likely to be ` 52.31 Lakh Crores increasing from ` 7.67 Lakh Crores in 2012–13 to ₹ 13.59 Lakh Crores in 2016–17. As noted earlier, growth in construction industry is linked to the growth in the

infrastructure sector and the building industry. The output of the industry is likely to be contributed almost equally by the buildings and infrastructure segments respectively. The thrust on capacity expansion in the infrastructure sector will continue in the Twelfth Plan.

Apart from steady growth in construction related to industrial buildings, the industry catering to commercial real estate in the non-residential sector is likely to grow at an accelerated pace due to a vibrant and growing service industry such as IT and related sectors, hospitality and tourism industry and logistics services. The real estate sector faces challenges despite strong growth in the past. The current trend in real estate market is that after making investments in land, the project construction is mainly retail financed, that is, through advances or milestone based payments from owners. In affordable housing projects retail financing would be a challenge as the ability of the retail investors would be very limited. This issue becomes more significant in the category of affordable housing for low income group and economically and weaker segments of the society.

Even though the construction sector is attracting both domestic (gross bank credit) as well as foreign direct investment, more resources are needed for the sector to fulfill the ever rising pressures of enhancing the housing and infrastructure sectors in the country. The cumulative FDI inflows from April 2000 to August 2011 into construction activities stood at around US\$ 9,417 million or ` 42,072 Crore, which is nearly 6 per cent of the total cumulative FDI inflow into the country during same period.

✓ **Process for execution of contract**

- **Identification of project**

We identify potential project and bid on select projects based on variety of factors such as project size, duration of projects, prior experience, and project profitability.

Bidding is done considering the entire cost factor involved in the project such as availability of labour, material, equipments, time required etc for completion of the project. - **Resource planning & Execution**

Based on the Project planning and the terms of the contract we ascertain the resources required for the timely completion of the projects. After completion of planning stage actual execution of the contract begins.

- **Project completions**

INDIAN CONTRACT ACT, 1872

Indian Contract Act codifies the way we enter into a contract, execute a contract, implement provisions of a contract and effects of breach of a contract. The Act consists of limiting factors subject to which contract may be entered into, executed and breach enforced as amended from time to time. It determines the circumstances in which promise made by the parties to a contract shall be legally binding on them. Each contract creates some right and duties upon the contracting parties. Indian contract deals with the enforcement of these rights and duties upon the parties.

The Indian Contract Act also lays down provisions of indemnity, guarantee, bailment and agency. Provisions relating to sale of goods and partnership which were originally in the Act are now subject matter of separate enactments viz., the Sale of Goods Act and the Indian Partnership Act. The objective of the Contract Act is to ensure that the rights and obligations arising out of a contract are honored and that legal remedies are made available to those who are affected.

THE PREVENTION OF FOOD ADULTERATION ACT, 1954

The Prevention of Food Adulteration Act, 1954 aims at making provisions for the prevention of adulteration of food.

The Act is the basic statute intended to protect the common consumer against supply of adulterated food and specifies different standards on various articles of food. The standards are of minimum quality level intended for ensuring safety in the consumption of these food items and for safeguarding against harmful impurities, adulteration etc. The Central Committee for Food Standards under the Directorate General of Health Services, Ministry of Health and Family Welfare is responsible for operation of this Act. Provisions of the Act are mandatory and contravention of the Rules can lead to

both fine and imprisonment. The standards of quality of various food articles have been specified in Appendix B to the Prevention of Food Adulteration Rules, 1955. Manufacture, sale, stocking, distribution or exhibition for sale of any article of food, including prepared food or ready to serve food, cannot be done by any person except under a licence.

THE FOOD SAFETY AND STANDARDS ACT, 2006 (THE "FSSA")

The standards prescribed by the FSSAI include specifications for ingredients, contaminants, pesticide residue, biological hazards and labels

Under section 31 of the FSSA, no person may carry on any food business except under a license granted by the FSSAI. The FSSA sets forth the requirements for licensing and registering food businesses in addition to laying down the general principles for safety, responsibilities and liabilities of food business operators. The enforcement of the FSSA is generally facilitated by 'state commissioners of food safety' and other officials at a local level.

The provisions of the FSSA require that every distributor to be able to identify any food article by its manufacturer and every seller by its distributor that should be registered under the FSSA and every entity in the sector is bound to initiate recall procedures if it finds that the food marketed has violated specified standards. Food business operators are required to ensure that persons in his employment do not suffer from infectious or contagious diseases. The FSSA also imposes liabilities upon manufacturers, packers, wholesalers, distributors and sellers requiring them to ensure that inter alia unsafe and misbranded products are sold or supplied in the market.

In order to address certain specific aspects of the FSSA, the FSSAI has framed several regulations such as the following:

- (a) Food Safety and Standards (Contaminants, Toxins and Residues) Regulations, 2011;
- (b) Food Safety and Standards (Food Products Standards and Food Additives) Regulations, 2011;
- (c) Food Safety and Standards (Licensing and Registration of Food Businesses) Regulation, 2011;
- (d) Food Safety and Standards (Packaging and Labelling) Regulations, 2011; and
- (e) Food Safety and Standards (Prohibition And Restrictions on Sales) Regulations, 2011.

The FSSAI has also framed the Food Safety and Standards Rules, 2011 (the "FSSR") which have been operative since August 5, 2011. The FSSR provides the procedure for registration and licensing process for food business and lays down detailed standards for various food products. The FSSR also sets out the enforcement structure of 'commissioner of food safety', 'the food safety officer' and 'the food analyst' and procedures of taking extracts, seizure, sampling and analysis.

Under section 51 of the FSSA, any person who manufactures food sub-standard food for human consumption is liable to pay a penalty which may extend up to 5 lakhs.

FSSA has defined sub-standard as, an article of food which doesn't meet the specified standards but not so as to render the article of food unsafe.

STATE LAWS

URBAN DEVELOPMENT LAWS

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages. Where projects are undertaken on lands which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved by the concerned municipal or developmental authority. Building plans are required to be approved for each building within the project area. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project.

AGRICULTURAL DEVELOPMENT LAWS

The acquisition of land is regulated by state land reform laws which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land which results in the aggregate land holdings of the acquirer in the state exceeding this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the State Government free of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate from the appropriate authority with respect to a change in the use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc., such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities. The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

In addition to the applicability of the above-mentioned legislations, we would additionally be subject to the applicable laws of the states where we intend to develop projects in the future and we would have to ensure compliance with the same.

ENVIRONMENTAL LAWS

Building and Construction projects must also ensure compliance with environmental legislation such as the Water (Prevention and Control of Pollution) Act 1974 (“**WPA**”), the Air (Prevention and Control of Pollution) Act, 1981 (“**APA**”) and the Environment Protection Act, 1986 (“**EPA**”). Such projects shall also ensure protection of marine life, human, animal and plant life at the site of work and also the places surrounding the work site.

The WPA aims to prevent and control water pollution. This legislation provides for the constitution of a Central Pollution Control Board and State Pollution Control Boards. The functions of the Central Board include coordination of activities of the State Boards, collecting data relating to water pollution and the measures for the prevention and control of water pollution and prescription of standards for streams or wells. The State Pollution Control Boards are responsible for the planning of programmes for prevention and control of pollution of streams and wells, collecting and disseminating information relating to water pollution and its prevention and control; inspection of sewage or trade effluents, works and plants for their treatment and to review the specifications and data relating to plants set up for treatment and purification of water; laying down or annulling the effluent standards for trade effluents and for the quality of the receiving waters; and laying down standards for treatment of trade effluents to be discharged. This legislation debars any person from establishing any industry, operation or process or any treatment and disposal system, which is likely to discharge trade effluent into a stream, well or sewer without taking prior consent of the State Pollution Control Board.

The Central and State Pollution Control Boards constituted under the WPA are also to perform functions as per the APA for the prevention and control of air pollution. The APA aims for the prevention, control and abatement of air pollution. It is mandated under this Act that no person can, without the previous consent of the State Board, establish or operate any construction plant in an air pollution control area.

The EPA has been enacted for the protection and improvement of the environment. The Act empowers the Central Government to take measures to protect and improve the environment such as by laying down standards for emission or discharge of pollutants, providing for restrictions regarding areas where industries may operate and so on. The Central Government may make rules for regulating environmental pollution.

MUNICIPAL LAWS

Pursuant to constitution (Seventy Fourth) Amendment Act, 1992, the respective State Legislature have the power to endow the Municipalities with power to implement schemes and perform functions in relation to matter listed Twelfth Schedule to the Constitution of India which includes registration of Public Health including the issuance of a health trade license for operating eating outlets and implementation of regulations relating to such license along with prescribed penalties for non-compliance .

POLICE LAWS

The State Legislatures in India are empowered to enact laws in relation to public order and police under Entries 1 & Entries 2 of the State List (List II) to the Constitution of India. Pursuant to the same the respective State of India have enacted law regulating the same including the registering eating house and obtaining the No-Objection Certificate for operating such eating houses with the police station located in particular area ,along with prescribed penalties for non-compliance .

SHOPS AND ESTABLISHMENT LEGISLATION

Under the provisions of local shops and establishments legislation applicable in the states in which establishments are set up, establishments are required to be registered. Such legislation regulate the working and employment conditions of workers employed in shops and establishment and provide for fixation of working hours, rest intervals ,overtime , holidays, leave ,termination of service, maintenance of shops and establishments and other rights and obligations of the employers and employees . Our Company's restaurant has to be registered under the Shop and Establishments legislations of the state where they are located.

OTHER LAWS

viii. RBI on March 13, 2014 amended the FEMA Regulations and laid down conditions and requirements with respect to investment by FPIs in Indian companies.

In terms of the SEBI FPI Regulations, any qualified foreign investor or FII who holds a valid certificate of registration from SEBI shall be deemed to be an FPI until the expiry of the block of three years for which fees 242 have been paid as per the SEBI FII Regulations. An FII shall not be eligible to invest as an FII after registering as an FPI under the SEBI FPI Regulations. Further, a qualified foreign investor who had not obtained a certificate of registration as and FPI could only continue to buy, sell or otherwise deal in securities until January 6, 2015. Further, in terms of the FEMA Regulations, the total holding by each FPI shall be below 10.00% of the total paid-up Equity Share capital of our Company and the total holdings of all FPIs put together shall not exceed 24.00% of the paid-up Equity Share capital of our Company. The aggregate limit of 24.00% may be increased up to the sectorial cap by way of a resolution passed by the Board of Directors followed by a special resolution passed by the Shareholders of our Company and subject to prior intimation to RBI. In terms of the FEMA Regulations, for calculating the aggregate holding of FPIs in a company, holding of all registered FPIs as well as holding of FIIs (being deemed FPIs) shall be included. The existing individual and aggregate investment limits an FII or sub account in our Company is 10.00% and 24.00% of the total paid-up Equity Share capital of our Company, respectively.
